Discuss with your vet signs of symptoms of scour (e.g watery discharge, shivering, vomiting etc). Every time you see a piglet with scour, colour in a square on the chart.

Also mark on any key management decisions, e.g change of room temperature, medication given etc

Record every case, manage daily and discuss and review regularly with your vet  
Set limits with your vet.

Set protocols for individual litters and outbreaks of scours.

*See reverse for an example.*
